

RANGER CONNECT

BUILDING NETWORKS

PROJECT DESCRIPTION

This project focuses on connecting rangers by building a membership network across Africa.

PROBLEM STATEMENT

Only 36% of rangers in Africa have access to an organisation that represents them.

PROPOSED SOLUTION

Providing supportive networks for rangers means they can build morale and share their experiences, specialised knowledge and best practices to ensure an effective community of practice which will benefit species, habitats, ecosystems and communities.

BENEFITS

- Improved communication and a sense of belonging.
- Improved ranger wellbeing and morale.
- Species, habitats, ecosystems and communities.

COSTS

- \$ 8 per field ranger membership/annum.
- \$ 35 per game ranger membership/annum.
- \$ 1000 per ranger to attend the African Ranger Congress.

OUR ACTION PLAN

Rangers work in remote areas where communication is often difficult meaning rangers often feel isolated and alone in the important work they perform. We organise digital ranger networks, facilitate ranger to ranger communication and organise networking events for over 1500 rangers across Africa.

HOW YOU CAN HELP

- Sponsor membership fees for a ranger or ranger team.
- Raise funds for our Ranger Connect Project.
- Spread the word about the need to support rangers.
