RANGER CARE

PROJECT DESCRIPTION

This project aims to facilitate the wellbeing of rangers working in Africa for their benefit as well as that of their families and dependents.

PROBLEM STATEMENT

88.6% of rangers surveyed across Africa had faced a life-threatening situation but 50% had no life insurance and 60% had no long-term disability insurance.

PROPOSED SOLUTION

Proactive measures in the form of remote area first aid training and equipping of rangers need to be undertaken. This should be underpinned by a reliable insurance programme that can provide medical evacuation, accidental death and disability cover. Post incident support in the form of trauma counselling should be provided.

BENEFITS

- Ranger safety and wellbeing.
- Ranger’s families and dependents.

COSTS

- $30 per ranger per annum for insurance.
- $170 per ranger for Remote Area First Aid Training and Equipment.

OUR ACTION PLAN

We provide accidental death, disability and medical evacuation cover to over 1500 rangers. In addition to this we train rangers in remote area first aid and provide them with first aid kits to ensure they are safe in the field. We have also been working with leading psychologists regarding post incident counselling for rangers.

HOW YOU CAN HELP

- Sponsor the insurance of a ranger or a ranger team.
- Raise funds for our Ranger Care Project.
- Spread the word about the need to support rangers.
